Flatland: The Movie

"FLATLAND: THE MOVIE" is an award-winning animated film inspired by Edwin A. Abbott's classic 1884 novel, "Flatland." Set in a world of only two dimensions inhabited by sentient geometric shapes, the story follows Arthur Square (Martin Sheen) and his ever-curious granddaughter Hex (Kristen Bell). When a mysterious visitor arrives from Spaceland (Michael York), Arthur and Hex must come to terms with the truth of the third dimension, risking dire consequences from the evil Circles that have ruled Flatland for a thousand years.

**We will also be discussing the upcoming trip to the
MAA-SE Section meeting at Mercer University.**

Refreshments will be served!

**Monday, February 27th at
1:30 PM**

Location: LSF 407B
